

## Joint Venture

**JOINT VENTURES** Single Source Supply & Joint Venture Technology Transfer Unequaled Sourcing and Importation Services-Shinemound's staffs have developed a network of the world's best suppliers and manufacturing facilities capable of meeting all of your requirements. SMI offers a single sourcing service specifically suited to locate your products and establish exclusive import requirements, consolidate products and expertise of foreign exporters, harnessing the power and capabilities of collective purchasing. In short, SMI can be your 'buying house' and 'importer' in the USA, complemented by their expertise and working knowledge of importation and FDA requirements. Single Source Supplier: -

- Disposable Medical Products
  - Medical examination Gloves
  - Isolation gowns, Sleeves, Coveralls
  - Masks-Surgical -Cone
  - Disposable IV sets, Urinary Drainage bags.
  - Disposable Suction Catheter.
  - Medical Instruments and Devices
  - Associated Equipment Parts and Industrial Parts
  - Other Products
- Bio-medical Engineering Professionalism** A-Working with the FDA - Throughout the years of sourcing and importation, Shinemound has developed a relationship with customers, factories and governmental bodies that have enabled SMI to overcome most of the everyday obstacles experienced by other importers. The result is; products reach the market on time and on budget. This minimizes customer frustration and emphasizes Shinemound's on-hands awareness of FDA procedures greatly benefits their clients which the marketplace.

**B- Quality Control of Product** - It is the policy of Shinemound to control the quality of the product to be imported, during the manufacturing stage, to a standard in excess of that of FDA requirements (AQL-2.5, for example, for Medical Gloves produced to SMI's documented quality control level AQL-1.5). In this way Shinemound can ensure minimal risk in having the product rejected by FDA at the point of importation.

**C- Pre-Shipment Quality Inspection** - Manufacturing standards and quality controls are strictly enforced by Shinemound. At customers request, this depth of pre-shipment inspection at the overseas factories.

**D- Murphy's Law Prevails** - There are varying means at Shinemound's disposal to minimize monetary loss caused by FDA rejection of medical products. Shinemound, for example, while complying with FDA requirements, can downgrade medical goods to industrial goods, repackage and ship to United States customers or to customers abroad in Europe, and South America, while meeting the standards of the port entry. Shinemound is confident in making such a prompt recovery or at the customer's discretion, the next shipment is FREE of Charge.

Shinemound can manufacture/source from China, Hong Kong, Indonesia, Malaysia, Taiwan and Thailand, and will personally oversee single or multiple product sourcing utilizing their vast overseas sourcing network, a capability and service unequalled by others in the 'Import/Export' business.
